DETAILED ACTION

This application filed July 31, 2003, claims benefit of 60/400,287, filed 07/31/2002.

Claims 1-21 are pending.

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention: the invention comprises the practice in any non-human animal species, species of methodology that results in enucleation, and methodology that is used for nuclear transfer. Each species of animal has its own unique characteristics that must be considered relative to the methods generally set forth, and each of the specific methods requires different materials, different method steps and has inherent considerations associate with the use of each one.

Applicant is required to elect:

- 1) one specific species of nonhuman animal for examination, and if a porcine species is elected, one of the specific species in claim 21 must be elected;
- 2) a specific method of enucleation must be elected, see claims 6-12, and;
- 3) a specific method of nuclear transfer must be elected, see claims 13-18.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-5, and 19 (the methods of activating an oocyte) are generic.

Art Unit: 1632

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1632

application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Woitach whose telephone number is (571) 272-0739.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ram Shukla, can be reached at (571) 272-0735.
